## Rotary Sweep Systems

**ABOUT US** SnapLok® is the next generation of 'Power Sweeping Technology' with several patents pending. Our mission is to provide state-of-the-art technology at an affordable price.

The SnapLok® line of innovative products was designed and developed by a long time chimney cleaning professional with more than 25 years experience.

SnapLok created the power sweeping industry more than 20 years ago and we are excited to bring SnapLok equipment to sweeps around the world.

The SnapLok® Power Sweep System uses the patented 'Dual Button - Push & Lock' connection. This design makes the connection extremely strong and allows the rods to be connected faster with a slight twist of the rod to lock the buttons into place. Our mission is to provide innovative products at an affordable price to make your job easier and more profitable. Proudly used by sweeps in more than 24 countries around the world.

SnapLok is now the No.1 choice by chimney sweeps for chimney sweep cleaning equipment worldwide.

# SnapLok

**THE MOST ADVANCED &  
LARGEST SELECTION OF  
ROTARY POWER CHIMNEY  
SWEEPING EQUIPMENT IN  
THE WORLD.....**

## THE SnapLok<sup>®</sup> DUAL BUTTON ADVANTAGE

- ⇒ The SnapLok 'Dual Button' connection is the fastest on the market, due to the fact that less rotation is needed to engage the buttons once joined together.
- ⇒ The 'Dual Buttons' increase the torque capabilities of the connection because the load is spread over two buttons. All 'Dual Buttons' are stainless steel for smooth operation of the connection and strength that further increases the torque capabilities.
- ⇒ The 'Dual Buttons' make it impossible to disengage while rotary cleaning, because both buttons cannot be pressed at the same time while spinning in the flue or vent, whereas a single button can easily disconnect.
- ⇒ The 'Dual Buttons' also provide more control when working with tools from above as they hang straight. Single button connections can cause the rods to drift off at an angle, since the weight pulls on the fitting/ single button at an angle when several rods are attached.
- ⇒ The SnapLok buttons have a tapered front allowing the male and female to be quickly and easily connected without having to depress the buttons, thus creating a "Push Lock" connection.
- ⇒ The SnapLok line offers the widest range of cleaning heads on the market and in the world, with several of our own innovations that are only available from SnapLok.
- ⇒ SnapLok is very competitively priced whilst maintaining the highest quality and innovation.
- ⇒ SnapLok has a proven track record and is now sold and used with rave reviews in more than 25 different countries by thousands of sweeps worldwide.
- ⇒ SnapLok is truly the next generation of rotary sweeping equipment and are constantly innovative.

## SnapLok AGA/Rayburn Biomass Kit - 8mm/10mm Rods

This kit is purely designed for sweeping 4", 5" & 6" multifuel, oil, gas Aga/Rayburn flues, biomass flues, plus some Scandinavian stoves that have limited access to sweep through, as they all generally have limited access and many offsets. This system is highly efficient and it takes less than 30 seconds to connect all the double button lock rods together. These rods are highly flexible and are ideal for sweeping a liner through an Aga, Rayburn cooker, biomass boiler, pellet stove or small ducting, especially where there is a 90 degree bend.

This kit will go up to 9 Metres in height, but additional rods can be purchased to extend this, but we'd only recommend the 10mm rods for extending the length as they give more strength at the back end and so less flexing. The heads (Ferrules) of the rods are made of solid stainless steel, so they do not corrode, unlike aluminium that pits and eats the metal if cleaning solid fuel/smokeless flues. The ferrules are also quadrupled crimped at each end onto the 8mm solid nylon rod. The rods are solid nylon and will therefore not snap like copolymer rods do as they are very brittle.

You have a choice of 4", 5" or 6" Propeller Brush which are made of stainless steel and solid nylon, the Rapid Light Loader whip head which is solid aluminium and only 16mm in width, so ideal for tight access, particularly in Scandinavian stoves like Contura's that have limited access. The propeller brushes are ideally made for biomass flues, but are also great on old liners and also with a liner on a bend that has soot sat in the bottom and that requires removal. Lastly the 8" Bullet Whip Head and a spare pack of 2.7mm whip line.

### Kit Contents

5 x 8mm - 90cm Solid Nylon Rods - Stainless Steel Ferrules - SNR08SS	1 x SnapLok 8"/200mm Bullet Whip Head - BW08
5 x 10mm - 90cm Solid Nylon Rods - Stainless Steel Ferrules - SNR10SS	1 x SnapLok 5"/125mm Rapid Light Loader - RLL-08

## SnapLok 10mm Liner Kit

This kit is purely designed for sweeping 4", 5" & 6" multifuel, oil, gas and biomass flues. This system is highly efficient and it takes less than 30 seconds to connect all the double button lock rods together. These rods are highly flexible and are ideal for sweeping a liner through an Aga, Rayburn cooker, biomass boiler, pellet stove or small ducting, especially where there is a 90 degree bend. The main difference between the 10mm rods and the 12mm rods are the size of the fittings(ferrules).

This kit will go up to 9 Metres in height, but additional rods can be purchased to extend this. The fittings (Ferrules) of the rods are made of solid stainless steel, so they do not corrode, unlike aluminium that pits and eats the metal if cleaning solid fuel/smokeless flues. The ferrules are also quadruple crimped at each end onto the 10mm solid nylon rod.

You have a choice of 5" or 6 Mini Mole Rotary Power Brush and the Rapid Light Loader whip head which is solid aluminium and only 16mm in width, so ideal for tight access, plus an 8" Bullet Whip Head. Both whip heads use the less aggressive thinner 2.7mm width whip line.

All the rods are red in colour and we do not make a lead rod, as we feel that this is a weakness in the kit. Using the same rod as a lead rod every time makes that one lead rod very weak after a period of time, and in our experience using other systems this can lead to a breakage of the lead rod, so rotating all the rods in the kit is the preferred method of power sweeping.

The 10mm rods can connect directly on the 8mm rods if needed, or with the 12mm rods by using the step adaptor (ADPT305).

## Kit Contents

10 x 10mm - 90cm Solid Nylon Rods - Stainless Steel Ferrules - SNR10SS	1 x SnapLok 5"/125mm Rapid Light Loader - RLL-08
1 x 5" Mini Mole Rotary Power Brush - RPB05	1 x SnapLok Small Drill Adaptor - DA600
1 x 8"/200mm Bullet Whip Head - BW-08	1 x 6" Mini Mole Rotary Power Brush - RPB06
1 x SnapLok 3ft Rod Caddy Bag - RCAD03	1 x SnapLok Hex Key (For changing whip line)

PRODUCT CODE		TRADE PRICE

## SnapLok 12mm Liner Kit

This kit is purely designed for sweeping 5", 6", 7" & 8" flexible steel, twinwall, clay liners, pumice liners and small flues. This system is highly efficient and it takes less than 30 seconds to connect all the stainless steel double button lock rods together. These rods are highly flexible and are ideal for sweeping a liner through a stove, where there is a 90 degree bend. This kit will go up to 10 Metres in height, but additional rods can be purchased to extend this. The heads (Ferrules) of the rods are made of stainless steel, so they do not corrode. The ferrules are also quadruple crimped at each end onto the 12mm solid nylon rod.

You can also use this kit for manual chimney sweeping, by connecting the SnapLok rods to a SnapLok to Whitworth adaptor and onto a liner brush if necessary. This kit comes with a 9" SnapLok Bullet Whip Head of which the length of line can be adjusted very easily by removing the screw in the base of the head to allow the whip line be replaced for a different size. The kit also comes with a soft 8" rotary brush that can also be used in 5", 6" & 7" liners.

All the rods are white in colour and we do not make a lead rod, as we feel that this is a weakness in the kit. Using the same rod as a lead rod every time makes that one lead rod very weak after a period of time, and in our experience using other systems this can lead to a breakage of the lead rod, so rotating all the rods in the kit is the preferred method of power sweeping.

## SnapLok Open Fire Kit

This kit is designed for power sweeping 8" - 20" open flues. This system is highly efficient and it takes less than 30 seconds to connect all the double button lock rods together. This kit will go up to 12 Metres in height, but additional rods can be purchased to extend this. All the rods have stainless steel buttons which are quadruple crimped to the fittings/ferrules on either end of the rod, plus the steel is heat treated for extra strength/durability and double plated for extra corrosion resistance.

This kit can also be used for manual chimney sweeping, by connecting the SnapLok rods to a suitable SnapLok adaptor and onto a brush if necessary. The kit comes with a 18"/450mm SnapLok Power Whip head and a 24"/600mm Power Whip head, of which the length of line can be adjusted very easily by removing the screw in the base of the head to allow the whip line be replaced for a different size. Also included are a 14" & 17" Soft Rotary Mole Brushes for more delicate flues that need sweeping.

The 15mm rods are red and the 18mm rods are black in colour. We do not make a white lead rod as we feel that this is a weakness in the kit. Using the same rod as a lead rod every time makes that one lead rod very weak after a period of time, and in our experience using other systems this can lead to a breakage of the lead rod, so rotating all the rods in the kit is the preferred method of power sweeping.

Rotary Sweep Systems

## SnapLok Complete Starter Kit

This kit has primarily been designed for the professional chimney sweep who is starting to get into rotary power sweeping. With this kit you can sweep 5", 6", 8" liners up to 10 metres and open flues up to 12 metres, using a combination of different rod sizes to sweep a flue, for example an open flue at 11 metres, use 4 of the 15mm rods and 8 of the 18mm rods. The kit comes with a selection of whip heads and mole brushes, plus some specialist heads for removing tar and birds nests, plus a selection of useful RPS kit.

The Power Whip Heads supplied are a 9"/230mm SnapLok Bullet for liners, 18" Power Whip Head with 2.7mm whip line and a 24"/600mm SnapLok Death Star Whip head that includes the Scrub Shaft, plus spare Power Whip Line to fit in your own Power Whip Heads, the length of the whip line can be adjusted very easily by removing the screw in the base of the head, this then allows the whip line be replaced for a different size.

This kit also comes with a selection of RPS Mole Brushes to sweep steel liners and open fires, plus a Whitworth adaptor for using with manual brushes.

Rotary Sweep Systems

## SnapLok Stove Shop/Installer Kit

This kit has primarily been designed for professional stove and liner installers/stove shop that pre sweep flues prior to dropping a liner, plus maintain their own installations once the liner has been installed. With this kit you can carry out a pre-liner installation power sweep up to 12 metres in normal open flues, and power sweep or manually sweep 5", 6" & 8" liners.

The power sweeping heads/brushes supplied are a 9"/230mm SnapLok Bullet Whip, 5" Mini Mole Rotary Brush, 6" Mini Mole Rotary Brush for liners and for pre-liner sweeps/debris removal work, a 24"/600mm Snaplok Death Star with Scrub Shaft, a Chain Whip and Chain Whip Double for tar removal, a SnapLok Cable Whip head for any potential birds nests and RPS Clay Liner Breaker for removing old ceramic/clay liners. The kit comes with the standard drill adaptor and the Hex shanked drill adaptor which is designed for use with the liner breaker.

This system is highly efficient and it takes less than 30 seconds to connect all the double button lock rods together. The rods are quadruple crimped to the fittings/ferrules on either end of the rod, and the steel is heat treated for extra strength/durability and double plated for extra corrosion resistance. ALL the buttons are Stainless Steel. The kit includes both the normal drill adaptor and the breaker version, plus two rod caddy bags to place all your rods into.

Rotary Sweep Systems

## SnapLok Max Power Kit

This kit has primarily been designed for the professional chimney sweep who wants the complete rotary power sweep system. With this kit you can sweep all liners and all open flues with rotary brushes and rotary whip heads, plus a selection of heads, for removing tar and birds nests.

There is a total of 45 meters of rods in this kit and made up of the ideal number for mixing and matching in different height and width flues. This system is highly efficient and it takes less than 30 seconds to connect all the double button lock rods together.

The 8mm, 10mm & 12mm rods are 90cm in length, the reason being is that the thinner rod you use at a long length then it loses its rigidity and can cause 'liner slap', stress the rod and eventually snap. So we found after much testing, a slightly stiffer but still very flexible rod is a better rod at 90cm and can get round 90 degree bends with ease. Many other rod manufacturers suffer with many rod breakages due to the brittleness of copolymer and the length of the thin rods, so they tend to snap at the fitting (ferrule), this does not occur with SnapLok rods.

The 15mm, 18mm & 22mm rods are quadruple crimped to the fittings/ferrules on either end of the rod, plus the steel is heat treated for extra strength/durability and double plated for extra corrosion resistance. The fittings (ferrules) for the 8mm, 10mm, 12mm & 20mm rods are stainless steel. ALL the buttons in every rod size are made from solid stainless steel.

**8 10 12 15**  
**18 20 22**  
**MM**

The liner power heads supplied are a 5"/125mm Rapid Light Loader and a 9"/230mm SnapLok Bullet Whip Head. Also for cleaning liners are 5" & 6" Mini Mole Brushes for rotary or manually cleaning steel liners from 4" - 8" in width. The other brushes are the 4" & 5" Propeller Brushes and the 6" Mini Mole which are great for pellet, biomass and Aga/Rayburn range cooker flues.

For open chimney flues, an 18"/450mm SnapLok Power Whip head and the superb 24"/600mm SnapLok Death-Star Whip head with the additional Scrub Shaft. The whip line length can be adjusted very easily by removing the screw in the base of the head to allow the whip line to be replaced for a different size. There is also spare whip line included within the kit. There is also the 14" & 17" RPS Large Mole Rotary Brushes for a more delicate sweep in old parged flues with loose mortar.

Also included is a Chain Whip for tar removal, a SnapLok Cable Whip head and Nest Buster for any potential birds nests, a power grip handle which is a great tool for holding when do hard deposit removal like tar or a stubborn birds nest. There are two reels of varying width spare whip line, plus a rod guide which is ideal for protecting your rods against sharp edges or screws. Finally there are also 3 brush adaptors that can be used for a Whitworth, Universal or M10 metric thread.

There is no white lead rod, as this is a weakness in the kit, as using the same rod as a lead rod every time makes that one lead rod very weak after a period of time, in our experience using other systems this can lead to a breakage of the lead rod, so rotating all the rods in the kit is the preferred method of power sweeping.

## NACS Starter Kit - Basic

This kit has been primarily designed for the professional chimney sweep that has completed the NACS Chimney Sweep Training Course and needs the minimum amount for a sweeps van check and assessment. With this kit you can sweep all sizes of liners from 5" upwards. You can use different rod sizes to sweep a flue, for example an open flue at 11 metres, use 4 of the 15mm rods and 7 of the 18mm rods. The kit comes with a selection of heads, for removing tar and birds' nests, adaptors for manual brushes plus a selection of useful RPS kit.

The power heads supplied are a 9"/230mm SnapLok Bullet for liners, 18"/450mm Snaplok Power Whip head and the superb 24" Death Star Whip Head with Scrub Shaft, plus spare Power Whip Line to fit in your own Power Whip Heads, of which the length of line can be adjusted very easily by removing the screw in the base of the head to allow the whip line be replaced for a different size. Also a selection of rotary mole brushes for stove liners and open fires.

## NACS Starter Kit - Max

This NACS Max kit has been primarily designed for the professional chimney sweep that has completed the NACS Chimney Sweep Training Course and needs a complete chimney sweep kit. This will be more than enough for the van check and assessment, but this kit also has extra equipment that allows you to progress without having to add additional kit at a later date, particularly when it comes to sweeping range cookers and large inglenooks. With this kit you can sweep all sizes of liners from 4" upwards and can use different rod sizes to sweep a flue, for example an open flue at 11 metres, use 4 of the 15mm rods and 7 of the 18mm rods. The kit comes with a selection of heads, for removing tar and birds' nests, adaptors for manual brushes plus a selection of useful RPS kit.

The power heads supplied are a 5"/125mm Rapid Light Loader for the 8mm/10mm rods, 9"/230mm SnapLok Bullet for liners, 18"/450mm Snaplok Power Whip head and the superb 24" Death Star Whip Head with Scrub Shaft, plus spare Power Whip Line to fit in your own Power Whip Heads, of which the length of line can be adjusted very easily by removing the screw in the base of the head to allow the whip line be replaced for a different size. Also a selection of rotary mole brushes for stove liners and open fires. .

### Kit Contents

8 x 8mm - 90cm Solid Nylon Rods - SNR08	1 x SnapLok Large Drill Adaptor - DA800
4 x 10mm - 90cm Solid Nylon Rods - SNR10	1 x SnapLok 8mm/10mm Drill Adaptor - DA600
4 x 20mm - 1m Solid Nylon Rod - SNR20	1 x SnapLok Hex Key (For changing whip line)
11 x 12mm - 90cm Solid Nylon Liner Rods - S/Steel Ferrules - SNR12	2 x SnapLok 3ft Rod bag - RCAD03
4 x 15mm - 1m Solid Nylon Rods - Steel Ferrules - SNR15	1 x SnapLok Steel Cable Nest Whip 450mm - CW450
8 x 18mm - 1m Solid Nylon Rods - Steel Ferrules - SNR18	1 x SnapLok Nest/Brush Retrieval Tool - RTN05
1 x 9"/230mm Bullet Whip Head - BW09	1 x 1/2" Whitworth Female - SnapLok Manual Brush Adaptor - ADPT805
1 x 5" RPS Mini Mole Brush - MMO-05	1 x Universal Male - SnapLok Male Brush Adaptor - ADPT705
1 x 6" RPS Mini Mole Brush - MMO-06	1 x SnapLok 8mm/10mm To Large Drill Adaptor - ADPT305
1 x 18"/450mm Power Whip Head - PW18	1 x RPS Rod Guide
1 x 24"/600mm Death Star with Scrub Shaft - DSW24	1 x RPS Telescopic Inspection Mirror
1 x 14" RPS Mole Brush - Soft - MMO-14S	1 x RPS Glass Scraper
1 x 17" RPS Mole Brush - Soft - MMO-17S	1 x SnapLok 25m x 4mm Whip Line Reel - RPWL-40
1 x SnapLok Adjustable Chain Tar Whip 12" - 18" - CHW12	2 x RPS/SnapLok Van Decals

## Guild of Master Chimney Sweep Kit - Basic

This kit has been primarily designed for the professional chimney sweep who intends to or has completed the Guild of Master Chimney Sweep Training Course.

This Basic GOMS Kit is primarily manual sweep biased but with the intervention of our RPS rotary moles and mini moles we believe that this kit does a similar job if not better than just a manual sweep kit. RPS has sold 1000's of mole brushes to Guild members.

With these kits you can sweep all sizes of liners from 4" upwards and open chimneys. Using a combination of different rod sizes to sweep a flue of various widths and heights. For example an open flue at 10 metres, use 3 of the 15mm rods and 7 of the 18mm rods. The kit comes with 12mm SnapLok Solid Nylon Liner Rods and also includes the option to purchase a large Wohler Floor Viper with 6" Soft Brush for sweeping liners.

### Kit Contents

11 x 12mm - 90cm Solid Nylon Liner Rods - S/Steel Ferrules - SNR12  
2 x 15mm - 1m Solid Nylon Rods - Steel Ferrules - SNR15  
10 x 18mm - 1m Solid Nylon Rods - Steel Ferrules - SNR18  
8 x 22mm - 1m Polypropylene Rods - Steel Ferrules - PPR22  
1 x 12"/300mm Bullet Whip Head - BW12  
1 x 24"/600mm Death Star with Scrub Shaft - DSW24  
1 x 6" RPS Mini Mole Brush  
1 x 8" RPS Mini Mole Brush  
1 x 17" RPS Mole Brush - Soft  
5" Bulldog Soft Manual Brush  
7" Bulldog Soft Manual Brush  
14" Bulldog Medium Manual Brush  
18" Bulldog Medium Manual Brush  
1 x SnapLok 25m x 4mm Whip Line Reel  
1 x SnapLok Large Drill Adaptor - DA800SS

1 x SnapLok Hex Key (For changing whip line)  
2 x SnapLok 3ft Rod bag - RCAD03  
1 x SnapLok Nest/Brush Retrieval Tool - RTN05  
1 x 1/2" Whitworth Female - SnapLok Manual Brush Adaptor - ADPT805  
1 x SnapLok Steel Cable Nest Whip 450mm - CW-MP  
RPS Cordura Heavy 1000 Denier Hearth Sheet 1.5m x 2m  
RPS Micro Hearth Sheet - 1.5m x 2m - BLACK  
RPS Stove Sweep Sheet - Black Polycotton - 90cm x 90cm - Medium  
RPS 8g Encapsulated White Smoke Pellets x 50  
1 x RPS Rod Guide  
1 x RPS Telescopic Inspection Mirror  
1 x RPS Monocular - 16 x 52  
1 x Rocket Lighter  
2 x RPS/SnapLok Van Stickers  
OPTIONAL: Wohler Large Viper & 6" Soft Viper Brush (See Page 73)

## HETAS Chimney Sweep Kit

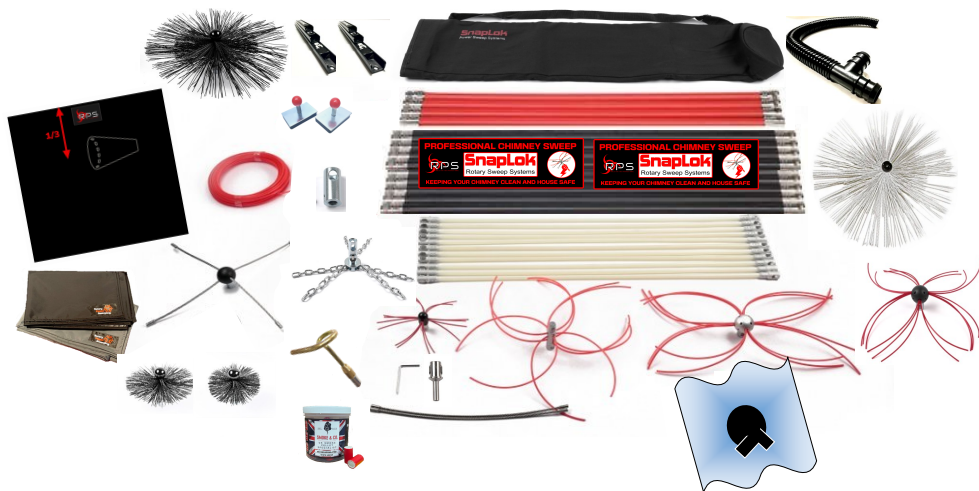

This This basic kit has been developed for the cleaning of chimney liners and open chimneys. Each cleaning head has a variation of aggressiveness, this includes a range of soft brushes such as the RPS 'Mole Brush' and the more abrasive heads like nylon and metal whip heads.

The variation of rods in this kit gives you the ability to clean a varied diameter range of flues liners and chimneys up to 12m in height. Flue liners from 5" to 8" using the 12mm rods, then standard sized open chimneys using a combination of 15mm & 18mm rods. For more tarred or nest blocked chimneys, there are the options of using the steel capped whips or the chains whips.

The protective sheets included in this kit will cover a large size range of stove openings and open chimney openings with the aid of magnets and tape to secure these to the appliance, giving you a secure sealed fit. The floor sheets and runners will give you enough coverage for placing all of your equipment on and protecting your customers floor/carpet.

This kit is a basic kit and the bare essentials needed to carry out chimney sweeping. More equipment will be required over a period of time to be able to clean more specific types of flues and appliances.

If you are needing more 'specific to the job' kit or are hesitant for what equipment you may need for a certain job do not hesitate to contact the RPS Team for advice..

## FLUE LINERS -

**1 x 9"/230mm Bullet Whip Head - BW09** - Suitable for cleaning flue liner widths from 5" to 8". The hex sides of the whips do the cleaning not the edges. Used for more tarred up flues where the mole brush struggles.

**1 x 5" RPS Mini Mole Brush Soft Black - 5"** Soft cleaning rotary brush for a more delicate clean if an old liner were to be cleaned where a whip could be too excessive.

**1 x 6" RPS Mini Mole Brush Soft Black - 6"** Soft cleaning rotary brush for a more delicate clean if an old liner were to be cleaned where a whip could be too excessive.

**5 x 12mm - 90cm Solid Nylon Liner Standard Rods - Stainless Steel Females - SNR12SS-UK** - Flexible range of 12mm rods for more flexibility going around initial bends and rear 90 degree T pieces when sweeping.

**6 x 12mm - 90cm Solid Nylon Liner Stiff Rods - Stainless Steel Females - SNR12SS-STIFF** - Stiffer range of 12mm rod for more rigidity when sweeping taller flues.

**1 x Snaplok Large Drill Adaptor - DA800SS** - Rounded shank drill adaptor for the drill, this locks into the bottom of your rods to rotate them

## OPEN FIRES -

**1 x 14"/8" RPS Mole Rotary Brush - Soft Black - 14"** Soft cleaning rotary 'Mole Brush' for a more delicate clean of an old chimney where a whip might be too excessive.

**1 x 17"/10" RPS Mole Rotary GRIT Brush - Larger 17"** Soft/Medium cleaning rotary 'Mole Brush' for a more delicate clean of an old chimney where a whip might be too excessive. It has a grit texture on the bristles giving it more of an abrasive scrub compared to the soft mole brush, the silicon cable inside the filament of the bristles also helps the brush last longer.

**1 x 16"/450mm Power Whip Head - PW18** - This uses a thinner 2.7mm grade whip line being a less aggressive whip head compared to the DSW24.

## WHAT'S IN YOUR KIT?

**1 x 24"/600mm Death Star with Scrub Shaft - DSW24** - The most aggressive whip head we manufacture with 4mm thick whip line and 36 whips overall. Very good for pre sweeping chimneys before a liner is installed or for cleaning very tarred up flues.

**1 x Snaplok Adjustable Chain Tar Whip 12" - 18" - CHW12** - Needed for very tarred up flues where a whip head is not sufficient. Use with caution as it can damage the internals of the chimney is not used properly.

**1 x Snaplok Steel Cable Nest Whip 450mm - CW450** - Used for removing birds' nests, not to be spun until you have pushed it up to the nest manually, pulse the drill when at the nest breaking the nest down.

**1 x RPS Rod Retrieval Tool - Snaplok Adaptor Fitted** - For manual use only when the CW450 might be too aggressive for birds' nests, this is for twisting, nest and pulling to slowly break up the nest.

**4 x 15mm - 1m Solid Nylon Rods - Steel Females - SNR15** - Suitable leader rods to get around initial bends in open chimneys, these will be used first, the 18mm rods will follow on behind.

**8 x 18mm - 1m Solid Nylon Rods - Steel Females - SNR18** - Suitable for keeping the whole setup more rigid when sweeping to be used after the 15mm rods.

**1 x Snaplok 4in Zipped Rod Bag - RCD04** - Storing the open fire kit and for ease of transferring the kit to and from the van.

**1 x Snaplok 25cm x 4mm Whip Line Reel** - Spare whip line for replacing worn out whip line in current heads, or to be used to make a custom sized whip head to suit a specific chimney size.

**1 x 1/2" Whitworth Female - Snaplok Female Manual Brush Adaptor - ADPT805** - Used for screwing manual heads onto the Snaplok rods if you wanted to manually sweep a chimney, make sure to only go clockwise when using this adaptor to reduce the risk of unscrewing the head inside the chimney.

## COVER/FLOOR SHEETS & ESSENTIAL TOOLS -

**1 x Snaplok Hex Key** - For changing out the existing whipline for new.

**2 x RPS/Snaplok Van Stickers** - Making your van look beautiful!

**1 x RPS Cordura Heavy Duty Hearth Sheet - 1.5m x 2m - GREX** - Your main hearth sheet, you want to keep this as clean as possible.

**1 x RPS Micro Hearth Sheet - 1.5m x 2m - GREX** - Your over sheet, this will be placed over your main hearth sheet for longevity of your main sheet, easier to clean than your main sheet.

**2 x RPS Micro Floor Runner - 0.75m x 3m - GREY** - Your runner sheets to be placed on customers floors/hallways when going from van to the chimney/appliance.

**1 x RPS Clear Sweep Sheet with Fitted Flange and T Piece for vacuum** - A clear sheet suitable for all stove sizes, clear viewing so you can see what is coming down the flue when sweeping. To be used with magnets.

**2 x Stove Magnetic Strips x 3** - For use with the Clear sweep sheet and open fire sweep sheet (if metal surround) to get a good seal around the opening of the flue.

**2 x RPS Rubber Magnet - 80mm / 55mm** - Used well with the strip magnets for the corners where the strip magnets might struggle getting a flush fit.

**1 x RPS Sweep Sheet - Halfway - Black Poly cotton: 125cm x 125cm - 4" x 4"** - Large - Used for sealing up open chimneys, can be used with pops (not included with kit) and sealed up around the edge with tape or magnets if the surround if metal.

**1 x RPS Rotary Rod Guide** - For placing inside of your sweep sheet, secured with a Velcro strap this helps direct the rods up the flue and keeps better control when sweeping, prevent also snagging the sheet with the rods.

**1 x RPS 37"/75mm x 50m Extra Strong Gaffa Tape** - For taping around the edge of the open fire when using the sweep sheet.

**1 x 8g Encapsulated White Smoke Pellets (Tub of 50) - 24m3 Smoke Volume - 60 Sec Burn Time - White Smoke** - Smoke testing for draughts or leaks or Smoke Test 1 & 2.

## HETAS Stove Installer Sweep Kit

This basic kit has been developed for the pre-cleaning of chimneys prior to installing a chimney liner and carrying out sweeping to flue liners thereafter. This kit includes a range of soft brushes such as the RPS 'Mole Brush' and the more abrasive heads like nylon and metal whip heads.

The variation of rods in this kit gives you the ability to clean a varied diameter range of flues liners and chimneys up to 12m in height. Flue liners from 5" to 8" using the 12mm rods, then standard sized open chimneys using a combination of 15mm & 18mm rods. For more tarred or nest blocked chimneys, there are the options of using the steel capped whips or the chains whips.

The protective sheets included in this kit will cover a large size range of stove openings and open chimney openings with the aid of magnets and tape to secure these to the appliance, giving you a secure sealed fit. The floor sheets and runners will give you enough coverage for placing all of your equipment on and protecting your customers floor/carpet.

## FLUE LINERS -

1 x 97/230mm Bullet Whip Head - BW09 - Suitable for cleaning liner widths from 5" to 8", the sides of the whips do the cleaning not the edges, used for more tarred up flues.

1 x 5" RPS Mini Mole Brush Soft Black - 5" Soft cleaning rotary brush for a more delicate clean if an old liner were to be cleaned where a whip could be too excessive.

1 x 6" RPS Mini Mole Brush Soft Black - 6" Soft cleaning rotary brush for a more delicate clean if an old liner were to be cleaned where a whip could be too excessive.

5 x 12mm - 90cm Solid Nylon Linner Standard Rods - Stainless Steel Ferrules - SNR12SS-UK - Flexible range of 12mm rods for more flexibility going around initial bends and 90 degree T pieces when sweeping.

6 x 12mm - 90cm Solid Nylon Linner Stiff Rods - Stainless Steel Ferrules - SNR12SS-STIFF - A stiffer range of 12mm rod for more rigidity when sweeping taller flues.

1 x Snaplok Large Drill Adaptor - DA800SS - Rounded shank drill adapter for the drill, this locks into the bottom of your rods to rotate them

1 x Snaplok 3ft Rod bag - RCAD03 - Storing the liner kit and transferring the kit to and from the vehicle.

## OPEN CHIMNEYS -

1 x 24"/600mm Death Star with Scrub Shaft - DSW24 - The most aggressive whip head we manufacture, very good for pre sweeping chimneys before a liner is put in place

1 x Snaplok Large HEX Breaker Drill Adaptor - DA800-HEX - A hexagonal shanked drill adapter for use with heavier metal heads to the shank doesn't spin inside of the drill chuck

1 x Snaplok Chain Whip - Adjustable 97/128" - CHW12 - Used for very tarred up flues where a whip head is not sufficient, use with caution as it can damage the internals of the chimney is not used properly.

## WHAT'S IN YOUR KIT?

1 x Snaplok Chain Whip Double - Adjustable 97/128" - CHW-DBL - Needed for very tarred up flues where a whip head is not sufficient, they can be attached underneath the CHW12 Making it double stacked for double the clean, use with caution as it can damage the internals of the chimney if not used properly.

1 x Clay Breaker Small - CLAY-SML - Suitable for removing standard and 8" clay liners, better to be used from top down, designed to spin off center and crack the pots when spinning.

1 x Snaplok Steel Wire Cable Nest Whip 450mm - CW450 - Used for removing birds' nests, not to be spun until you can feel it up to the nest manually, pulse the drill when at the nest breaking the nest material.

2 x 15mm Solid Nylon Rods - Steel Ferrules - SNR15 - Suitable leader rods to get around initial bends in open chimneys, these will be used first, the 18mm rods will follow on behind.

10 x 18mm Solid Nylon Rods - Steel Ferrules - SNR18 - Suitable for keeping the whole setup more rigid when sweeping to be used after the 15mm rods.

1 x Snaplok 3ft Rod bag - RCAD03 - Storing the open fire kit and for ease of transferring the kit to and from the van.

## COVER/FLOOR SHEETS & ESSENTIAL

### TOOLS -

1 x Snaplok Hex Key - For changing out the existing whipline for new.

2 x RPS/Snaplok Van Stickers - Making your van look beautiful!

1 x RPS Cordura Heavy Duty Hearth Sheet - 1.5m x 2m - GREY - Your main hearth sheet, you want to keep this as clean as possible.

1 x RPS Micro Hearth Sheet - 1.5m x 2m - GREY - Your over sheet, this will be placed over your main hearth sheet for longevity of your main sheet, easier to clean than your main sheet.

2 x RPS Micro Floor Runner - 0.75m x 3m - GREY - Your runner sheets to be placed on customers floors/hallways when going from van to the chimney/appliance.

1 x RPS Clear Sweep Sheet with Fitted Flange and T Piece for vacuum - A clear sheet suitable for all stove sizes, clear viewing so you can see what is coming down the flue when sweeping. To be used with magnets.

2 x Stove Magnetic Strips x 3 - For use with the Clear sweep sheet and open fire sweep sheet (if metal surround) to get a good seal around the opening of the flue.

2 x RPS Rubber Magnet - 80mm / 55mm - Used well with the strip magnets for the corners where the strip magnets might struggle getting a flush fit.

1 x RPS Sweep Sheet - Halfway - Black Poly cotton: 125cm x 125cm - 4' x 4' - Large - Used for sealing up open chimneys, can be used with props (not included with kit) and sealed up around the edge with tape or magnets if the surround if metal.

1 x RPS Rotary Rod Guide - For placing inside of your sweep sheet, secured with a Velcro strap this helps direct the rods up the flue and keeps better control when sweeping, prevent also snagging the sheet with the rods.

1 x RPS 97/75mm x 50mm Extra Strong Gaffa Tape - For taping around the edge of the open fire when using the sweep sheet.

1 x 8g Encapsulated White Smoke Pellets (Tub of 50) - 24m3 Smoke Volume - 60 sec Burn Time - White Smoke - Smoke testing for draughts, leaks, Smoke Test 1 & 2.

## SnapLok Dual Button Liner Rods

### 8mm & 10mm Rods

The 8mm & 10mm rods are made from extremely durable solid nylon and are quadruple crimped at each end of the fittings/ferrules, they are corrosion resistant as they are made from stainless steel, with double stainless steel buttons for double security. They are extremely flexible for tight bends and ideal for 3" to 6" flues for multifuel, oil, gas, biomass flues and duct cleaning rods. These fittings are only 16mm in width and independent of the larger rods from 12mm upwards, but they can be connected to the larger rods using an adaptor(ADPT305).

### 12mm Rods

The 12mm rods are made from extremely durable solid nylon and are quadruple crimped to the fittings/ferrules on either end of the rod, they are manufactured from solid stainless steel, so there is no corrosion. There are two stiffness grades of 12mm rods, the standard flexible rod, then the extra stiff 12mm rod which is grey in colour. These rods are very light but strong and suited to sweeping stove liners, plus coping with 90 degree bends with ease, they are suitable for liners from 5" to 8" and no larger.

### Rod Lengths

The 8mm, 10mm & 12mm rods are purposely 90cm in length, the reason why is that the thinner the rod that is used, the too long a length loses its rigidity and causes 'liner slap', this stresses the rod which will eventually snap. We found after much testing, a slightly stiffer but still very flexible rod is a better rod at 90cm and can get round 90 degree bends with ease. The 15mm, 18mm, 20mm and 22mm rods are all 1 metre in length. Many other rod manufacturers suffer with many rod breakages due to the brittleness of copolymer and the length of the thin rods, so they tend to snap at the fitting(ferrule), this does not occur with SnapLok rods.

### Rod Colour

The SnapLok range of rods are now also colour coded for ease of selection when removing from the van or rod bag:

8MM - 12MM - WHITE RODS

12MM STIFF - GREY RODS

18MM - 22MM - BLACK RODS

## SnapLok Dual Button Open Chimney Rods

### 15mm, 18mm & 20mm Rods

The 15mm & 18mm rods are made from extremely durable solid nylon, quadruple crimped to the fittings/ferrules on either end of the rod, plus the steel is heat treated for extra strength/durability and double plated for extra corrosion resistance, with stainless steel double buttons for extra security. SnapLok also produce 15mm, 18mm & 20mm rods with solid stainless steel fittings/ferrules, the ultimate in non-corrosive metals longevity.

### 19mm & 22mm Rods

The 19mm and 22mm rods are made from hollow Polypropylene and are quadruple crimped to the fittings/ferrules on either end of the rod, plus the steel is heat treated for extra strength/durability and double plated for extra corrosion resistance. The 19mm rods are very light and make excellent manual sweeping rods. The 22mm rods are a very stiff and light rod for working in tall flues and are great combined with the 22mm Aluminium Rods.

# SnapLok DEATHSTAR

## The Death Star Scrub Head

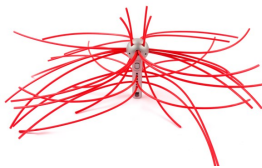

The SnapLok Death Star Scrub Head range is manufactured from one solid piece of aircraft aluminium, so it's very light, powerful and stays very central within the flue and only takes minutes to re-strand when necessary. It also comes with the additional 4"/100mm aluminium Scrub Shaft.

**12"/300mm Death-Star - DSW12**

20 x 2.7mm Whips = 40 Points of Contact - Solid Aluminium Body With Detachable Scrub Shaft And Adjustable Vertical Whips, Also Suitable For Nest Removal

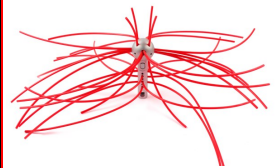

**£82.00**

**18"/450mm Death-Star - DSW18**

18 x 4mm Whips = 36 Points of Contact - Solid Aluminium Body With Detachable Scrub Shaft And Adjustable Vertical Whips, Also Suitable For Nest Removal

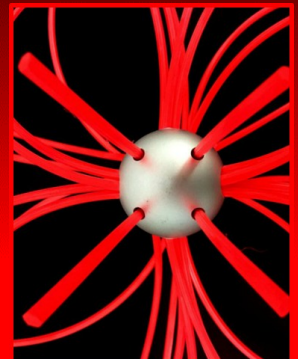

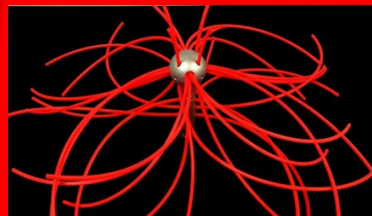

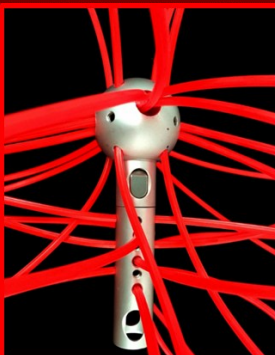

**£84.00**

**24"/600mm Death-Star - DSW24**

18 x 4mm Whips = 36 Points of Contact - Solid Aluminium Body With Detachable Scrub Shaft And Adjustable Vertical Whips, Also Suitable For Nest Removal

## SnapLok Specialist Rotary Heads (Suitable for 12mm - 22mm Rods)

**4"/100mm Blockage Buster NB04**

4" x 8mm Thick Steel Cable with Stainless Steel Caps. Solid Aluminium Bullet Whip Body

**£49.50**

**Nest/Blockage Buster Aluminium - NBA**

4" x 8mm Steel Cable with Stainless Steel Caps & 4 x Vertical Steel Cables. Solid Alum Power Whip Body

**£82.50**

These pieces of kit have been designed to remove compact blockages, particularly in dense, damp, compacted birds nests that need to be loosened up prior to the removal of the nest or blockage. It can be used in conjunction with the nylon whip Scrub Shaft or with the 6mm or 8mm Stainless Steel Capped Scrub Shaft. These items must be used correctly with a survey prior to use if possible, to prevent damage to the chimney flue.

**6mm Cable Scrub Shaft - SCRBSHFT-6**

6mm x 200mm Cable Whips With Stainless Steel Caps. 4" Solid Aluminium Scrub Shaft

**£36.30**

**Scrub Shaft With Multiple Length Frayed Cables - SSB-SHFT**

## Stove Installer Tools & Equipment

At RPS HQ we are frequently contacted by stove installers and chimney sweeps that encounter blocked chimneys or have a restriction in a chimney flue, so installing a flexible or twinwall liner is impossible or too restrictive. Having just normal rotary or manual sweep equipment will just not move or unblock the chimney, so over the years and based on our own experience as ex-chimney sweeps and liner installers, we have developed a range of specialist tools to enable the installation of a chimney liner or the removal of a stubborn blockage to hopefully be that much easier.

We do state that prior to using any of this equipment, that if possible a CCTV inspection is carried out prior to any potentially damaging work is carried out.

Sweeps Chimney Services

### RPS Liner Puller with SnapLok Half Rod - 5" & 6" Nose Cones

Designed to assist in getting a flexible liner down a chimney flue, particularly if you are working on your own. It helps to get the liner around and down some of the tight bends. There are holes in the end of the ball to connect a rope if necessary and also the rod can be extended with more SnapLok rods to also aid in getting the liner down the chimney.

## RPS Cutting/Boring/Honing Chains

**RPS Honing/Cutting Chains 6"**

6" Diameter Tungsten Carbide Toothed Cutting Chains For honing blockages in chimneys or remove cement snots or cutting through a pumice liner

**£135**

**RPS Honing/Cutting Chains 8"**

8" Diameter Tungsten Carbide Toothed Cutting Chains For honing blockages in chimneys or remove cement snots or cutting through a pumice liner

**£155**

**RPS Snot Clearing Chains 6" & 8"**

6" or 8" Diameter Steel Chains With No Cutting Blades. Designed For Removing Cement Snots In Clay Liners

**6" £64.00**

**8" £68.00**

**RPS Tiger Boring Chains - 3"/75mm**

Designed for boring/cutting through a hard solid blockage. The idea being that if there is a solid blockage/plug, then this hardened steel cutting head with carbide teeth can create an initial hole, to then allow you to use the larger Honing Chains to open up the hole even further, then allowing you clean the flue more successfully.

# SOON DEVIL

***THE DEVIL IS IN THE DETAIL***

**PROFESSIONAL CHIMNEY  
SWEEP HEPA VACUUM  
RANGE**

**DESIGNED BY SWEEPS  
FOR SWEEPS**

**THE DEVIL IS IN THE DETAIL**

### **Airflow**

When contemplating a chimney sweep vacuum purchase there is too much emphasis on the number of motors and the wattage a chimney sweep vacuum produces. More important is airflow, this should be the first consideration as this determines the strength of the vacuum and the air it can pull through the machine which is measured in CFM(Cubic Feet per Minute) with a pre-filter, HEPA filter and a vacuum hose connected. The SootDevil range of chimney sweep vacuums, use robust Ametek motors that produce 108CFM of airflow with one motor and 175CFM with both motors turned on.

### **Carrying Weight**

Weight can be an issue when carrying vacuums, so the largest SootDevil vacuum weighs 18kg and the lightest SootDevil, the RPV-10X weighs only 10.5kg, so this makes an ideal spare vacuum for upstairs work, as a back up to your main vacuum or can even be used as a main vacuum due to its power.

### **Filtration**

The SootDevil chimney sweep vacuum filtration use 3 stages of filtration, the first is the closed Hepa-Flo woven filter collection bag, then the pre-filter Dry Filter and finally the H14 rated HEPA filter which is rated at 99.995%

All models feature a 3 stage filtration system, ensuring safe and easy decontamination as well as giving the HEPA filters an extended product life. The vacuum range conform to BSEN 60335-69:2012 ANNEX AA. All vacuums are CE compliant and are PAT Tested.

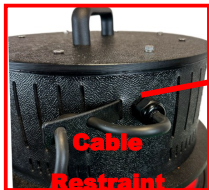

Features Include:

- Locking safety clips on drum to avoid accidental opening and spread of contaminated material during transit or use
- Vacuums use a closed HEPA-FLO Bag as standard
- 2 x Independent motor switches on twin motor SootDevils
- Hiloflex 3 meter x 38mm hose as standard or optional 3 meter x 51mm vacuum hose
- Noise level of the SootDevil has now been reduced to below 66db
- 12 month 'Return to Base' warranty

THE DEVIL IS IN THE DETAIL

## THE DEVIL IS IN THE DETAIL

The SootDevil HEPA vacuum cleaners are powerful, robust, lightweight and triple filtered, using HEPA bags, a dry pan drip in filter, plus a H14 HEPA free flo filter. The SootDevil range come in 7 configurations that includes two small lightweight single motor 10 litre vacuums which are less than 10kg in weight. Two 15 litre & three 25 litre twin motor vacuums all with independent motor switches. The SootDevil vacuums can be configured with or without wheels, an optional SootDevil Trolley and SootDevil Stack System. Each SootDevil comes with a 3 metre 38mm Hiloflex vacuum hose as standard. All metal components fitted to the SootDevil are made from stainless steel to prevent corrosion. Extremely simple to maintain as the main HEPA filter and SootDevil motors take less than 5 minutes to replace.

# SOOTDEVIL

THE DEVIL IS IN THE DETAIL

2G  
SECOND GENERATION

## 2nd Generation

The SootDevil range of vacuums are now a 2nd Generation model since November 2023, they have been redesigned internally and externally.

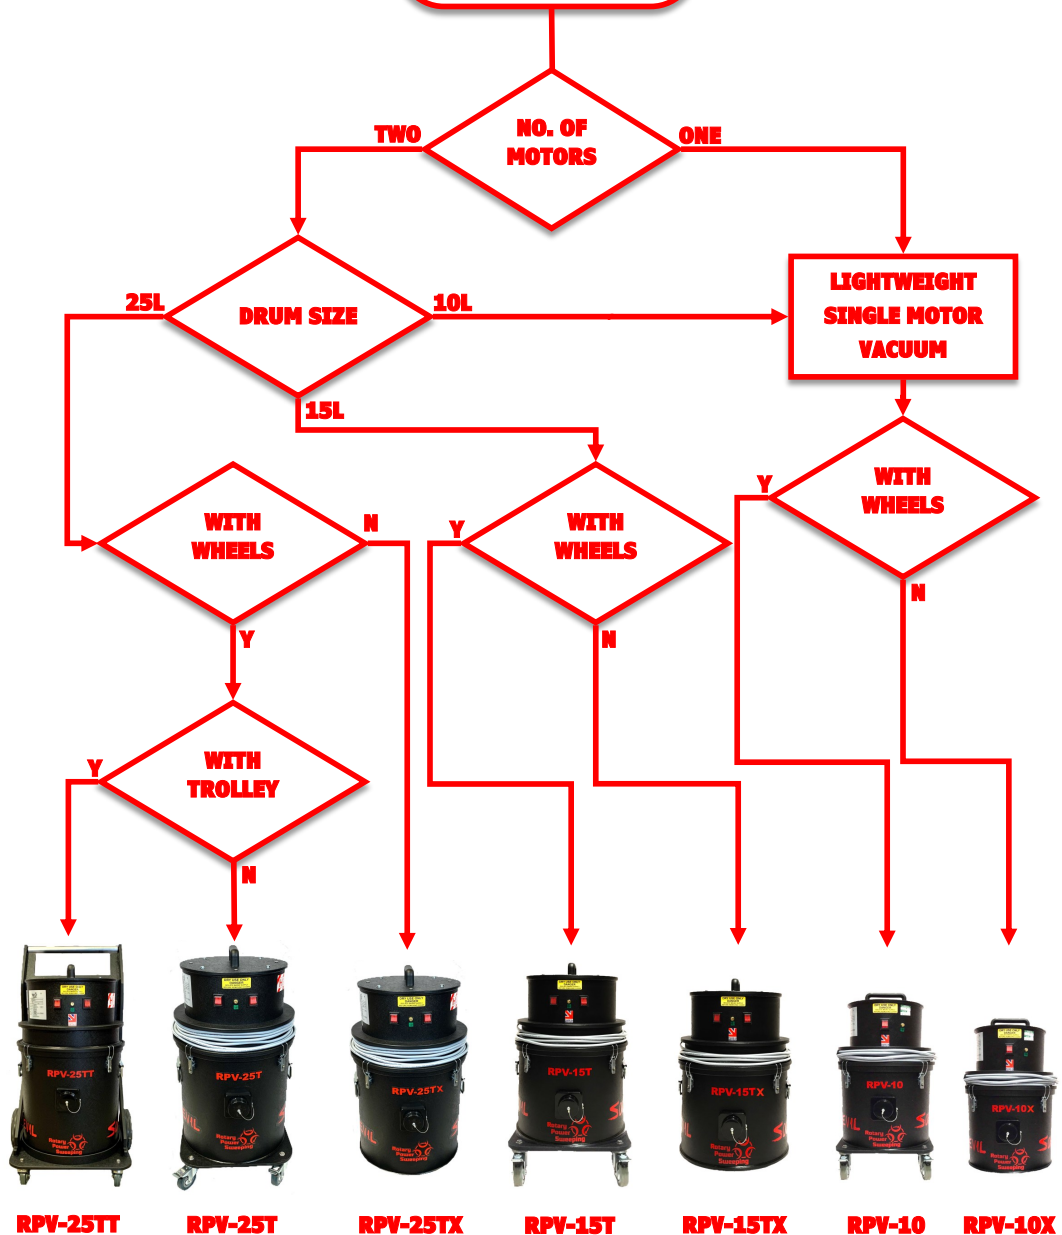

- Internally - The vacuum now runs cooler due to the flow of air over the motors being increased plus more air vents have been increased in size. The decibel level of the vacuum has been reduced, due to redesign and better sound insulation.
- Externally - Added to the vacuum is a USB charging socket(1.0Amp), so it can be used to charge torches, phones or some small rechargeable inspection cameras. The illuminated motor switches will now only illuminate when the motor is actively turned on, rather than be illuminated permanently when plugged into the mains. There is a new cable restraint on the rear of the vacuum head, this will reduce the stress on the cable when being wound up.

## SIZE COMPARISON

RPV-25T(TWIN MOTOR) - RPV-10X(SINGLE MOTOR)

## SOOTDEVIL VACUUM SELECTION

**THE DEVIL IS IN THE DETAIL**

## TESTIMONIALS - FEEDBACK

Brilliant piece of kit, I got a SootDevil to replace my Dustcontrol vacuum and it knocks the spots off it. I use it with the separator which is a must to me, saves on bags and cleaning filters which is great. RPS is the best equipment and company to use and ideal for any professional chimney sweep.

D Collin Chimney Sweep

Bought the larger RPV-25T twin motor vacuum to replace my twin motor Numatic, the SootDevil completely blows the Numatic out of the water! Really impressed with the power, expensive but worth it. A+++

Dave The Sweep

Having been in the sweeping industry for over 15 years, I have used several good brands of HEPA vacuums. The one thing all of these were lacking was better suction power, for both standard flues and knockouts, whilst still having maximum HEPA filtration. Having waited in eager anticipation for the SootDevil to finish its trials and go to market, I made sure I was front of the line to order up the RPV-25T model. I can honestly say, the wait was well worthwhile. Having owned the SootDevil and the innovative Dust Separator for over a year now, I have been extremely impressed with its performance and also the outstanding follow up service. You might say the SootDevil sucks big time, but that's the reason why Dusty Sweeps shall continue to use them from now on. Dusty Sweeps - Swindon

Love my SootDevil vacuum. Had it now a whole year & find it easier & more robust than previous vacuums. It's the RPV-25TX the twin motor flat based with individual switches. Filters & spares have always been available. It also looks professional to my customers who often compliment it as a "good looking piece of kit" It's the most powerful vacuum I've owned, that's for sure.. I would just mention though, make sure you don't accidentally unclip any of the 4 securing latches( that said, I do keep a tightly loaded van) I'm sticking with SootDevil.

PJ Sweeps

I was using a numatic vacuum and heard about the SootDevil vacuum and how it had been very well received by fellow sweeps. I bought one and I'm extremely happy with everything about it, it's a great purchase for any chimney sweep I'd say.

J W Smith Chimney Sweep

I have to say, I love my SootDevil, it does everything that I expected it would. I do not have a bad word to say about it, it is just absolutely perfect for what I wanted it for.

Apex Chimney Sweeps

Very pleased with my SootDevil vacuum. Great suction and not too noisy. Bought as my main vacuum has seen better days as a back up but mainly using this daily now. Very user friendly and clearly designed with Sweeps in mind. Made in Britain as well. Totally satisfied with this purchase.

Sootbusters of Berkshire

I've had the big, twin motor SootDevil for around a year now. It's a brilliant vac, very well thought out. Get one if you can.

Aizlewood Chimney Services

10 years sweeping; I've used Dustcontrol, Sturdyvac and Numatic before my SootDevil 10X arrived. All of the preceding ones I had used had good points, but each had their own bad points in my opinion. Important for me is Weight, Decibel Rating, Suction power, Bag Change efficacy. The SootDevil scores 10/10 in each of these areas for me. I do get the occasional soot breach when I've overlooked changing the bag, but the 2nd and 3rd filters do their jobs when needed. I wouldn't buy anything else now. Cleaner Chimneys

Fantastic vacuums, we have two of these (the largest and the smallest). Both are great, fantastic suction, much quieter than similar brands, easier to change filters etc & backed up with great service. If you need a vacuum for chimney sweeping, then look no further. OJB Services

I've now got two SootDevil's, the largest 25L to replace a Numatic 750 and the smallest 10L for chimneys with difficult access when carrying the large vacuum is not practicable. I had a Numatic for 8 years prior to purchasing the 25L machine and there is no comparison. The SootDevil has far more suction even with just one motor running than the Numatic ever did. It's also far easier to change a full bag on the SootDevil than the Numatic. The 10L machine also has loads of suction and is really light and portable. Filter changing/ cleaning is simple on both machines and the motors simply bolt in. I also really like the hose carriers that attach to the top of the machines. TL Chimney Sweep Services

**Satin Reusable Zipped Vacuum Bag - Small**

Suitable for SootDevil & Numatic Vacuums

**£50.00**

Suitable for the RPS SootDevil twin motor, these satin reusable zipped bags are great for containing any soot that leaks or bursts from HEPA bags fitted to your vacuum.

It works by placing the satin bag onto the drum spigot, then place your HEPA bag onto the drum spigot as normal, then zip up and close the reusable bag. Any leakages or bursts are then contained within the reusable bag, so this prevents any dirty filters or soot getting into the drum.

**Satin Reusable Zipped Vacuum Bag - Large**

Suitable for SootDevil & Numatic Vacuums

**£60.00**

### SootDevil Service Kits

It is recommended that your SootDevil Vacuum HEPA Filter is replaced annually, This maintains the air filtration integrity for you, your customer and protects your vacuum motors from soot particles entering the motor head.

RPS now sell a choice of SootDevil Service Kits for the single or twin motor vacuum which contain a HEPA Filter, pre-filter spare motor/s, replacement cable and satin filter bag. All motors will fail over a period of time and rather than be without a vacuum, the SootDevil has been designed so that a new motor can be replaced in less than 5 minutes, it's very simple and there is even a instructional video on the Rotary power Sweeping YouTube channel, giving a full demonstration.

CHECK OUT THE **YouTube** VIDEO: 'Rotary Power Sweeping Dust Separator - How it works'

## RPS Mole Brushes®

Mole Brushes have been designed and developed by Rotary Power Sweeping Ltd, it is a rotary brush that looks like a manual brush, but has been purposely designed to be rotary spun in an open flue where there is old parged & loose mortar within flues, including inglenooks.

Rather than remove the mortar, the soft perlon brush only removes the loose soot, so is far gentler than a rotary whip head and even certain grades of manual brush.

The Hard Mole Brush with nylon bristles was developed for removing harder soot deposits, particularly solid fuel soot build up. All Mole brushes are crimped onto a SnapLock Adaptor, so they can be slowly spun in either direction without fear of loosing the brush.

The 14" & 17" Mole Brushes have an outer and an inner core, the 24" bristles are one length and primarily designed for old inglenooks.

PRODUCT CODE		RETAIL PRICE

All Prices Exc VAT

Rotary sweeping equipment has changed hugely in the past couple of years, so as part of this change RPS designed and developed a liner Mini Mole Brush, mainly as there were fears of power sweeping liners, particularly old liners. So this rotary brush can be used manually and rotary in a liner. All the RPS Mole brushes come fitted with a SnapLok adaptor.

The RPS Mini Mole Brush will not damage a liner, it will not burn your drill out, plus it will allow the soot to fall through the bristles whilst rotary sweeping to prevent pressure build up in the liner and the bristles are 1/2" oversized to ensure a thorough clean, particularly on a bend and come in 4 sizes and 4 bristle grades from Soft, Medium Grit and Hard:

5 1/2" - 135mm

6 1/2" - 165mm

7 1/2" - 190mm

8 1/2" - 215mm

\*\*\*Be wary of other brush manufacturers claiming they manufacture or sell Mini Mole Brushes or Rotary Brushes\*\*\*

These are just a manual brush with twisted screw shaft, dense bristles and are heavy. These WILL grab any loose lining material

RPS Duster Brushes aka ‘The Don King’!

Rotary Power Sweeping has redesigned and updated the original wood and glue chamber sweeping brush, known as the ‘Don King’. We now call it the RPS Duster Brush, it’s fitted and pinned with a SnapLok Adaptor to allow fitment straight onto the SnapLok rod. These brushes are manufactured from solid polypropylene with a steel threaded shaft through the centre, which is secured with a locking nut to keep the brush together and will not fall apart and lose the bristles.

The brushes are great for cleaning fluffy loose soot in open fire gathers and smoke chambers, some sweeps even use this brush for the entire length of a brick chimney. The Duster Brush is available in Soft, Medium or Hard.

PRODUCT CODE		PRICE
DUS-BR-S	RPS Duster Brush – Soft	£60.00
DUS-BR-M	RPS Duster Brush – Medium	£60.00

### RPS Stackable Rod Box

RPS designed two rod boxes as an alternative to rod bags, can be used to carry rods and equipment into a property or purely for van storage, making rod selection easier also. Very durable and no longer than a rod bag. Can also be jet washed and cleaned out.

#### RPS Rod Box - Stackable

- Solid Polypropylene
- Seam Welded Joints
- Extremely Strong & Robust
- 4 Rubber Feet On The Underside For Stacking
- Heavy Duty Carrying Handles - PVC Plastic & Polypropylene Webbing
- Rod Boxes Can Be Stacked For Van Storage Purposes
- Length 108cm x Width 16cm x Height 13.5cm (3 x Rod Boxes Stacked = 38.5cm Total Height) - Weight 3kg

**£95.00**

#### RPS Heavy Duty Rod Bag

Heavy Duty Rod Bag, made with a strong, 560 grams U/V resistant high tenacity polyester plasticized PVC fully waterproof material.

The base of the bag contains a rubber disc base for additional strength.

98cm long with an adjustable shoulder carrying straps and a grip handle. This bag has a heavy duty zip that can be zipped half way down, so you can very easily access your rods.

## Innovative and award-winning concept

Prevent knee and back problems with FENTO's unique ergonomic pressure distribution technology. With most knee protectors, the pressure is concentrated on the kneecap, which can lead to knee injuries. FENTO's innovative and award-winning concept evenly distributes the pressure across the lower leg, using an ergonomic wedge in all of the FENTO products. This is a major ergonomic improvement, preventing knee and back problems. It makes working on your knees healthier and more comfortable. Why do FENTO knee pads also help prevent back problems? A stable sitting position is key in order to keep your back safe. Therefore, FENTO's products are designed to provide stability. The wide and flat surface provides a firm kneeling position. FENTO's ergonomic knee protectors are not just for professionals that already suffer from knee and back problems. In fact, physiotherapists claim that prevention is always better than cure.

Invest in the right protection right now and you will thank us later!

## RPS Runners & Hearth Sheets

### RPS Cordura 1000 Denier Heavy Floor Sheets & Runners

The polyurethane coating creates a waterproof barrier on the inner face of the fabric. There is also a DWR (durable water repellent) finish on the face of the fabric that encourages liquids to bead and roll off. The fabric has a texturised, matt finish. It is very hardwearing fabric and has excellent anti abrasion properties. Makes excellent heavy duty floor sheets and floor runners.

### CORDURA HEARTH SHEETS

RPS Black Cordura Heavy Duty Floor Hearth Sheet - 2m x 1.5m (5ft x 6ft)		£40.00
RPS Grey Cordura Heavy Duty Floor Hearth Sheet - 2m x 1.5m (5ft x 6ft)		£40.00

## Chimney Caps

### C-Cap how it works...

Injection-moulded from tough, recyclable ABS thermoplastic, the C-Cap fits neatly over the chimney pot, where it is retained by galvanised steel spring wires. It can be fitted to any standard round of appropriate size and is light enough to allow several to easily be carried up the roof, where fitting to the pot takes a matter of seconds. The standard 300mm C-Cap fits pots up to 11" external diameter and is supplied with an integral insect screen (use optional), to provide additional protection against swarming bees and nesting wasps. The larger 350mm C-Cap is designed for 13" pots and does not include an insect screen. Pots need to be in sound condition. Any cracked pot should either be replaced or suitably strapped to allow insertion of the C-Cap retaining wires.

#### Small C-Cap - Terracotta

300mm Outside Edge, Fits Pots With 11" Outside Diameter

£20.00

# R.P.E.

## Comparison of PAPR v's Resusable Respirator

**Easy Breathing**

**High Protection**

**Cost Effective**

Breath Responsive PAPR provides purified air by fan responding to breath.

Pressure inside the facepiece is kept positive to provide a higher safety.

Even if airtightness breaks, the fan will keep running to lower the risk of breathing in particles.

**Safety**

Filter lasts longer than Reusable Respirator.

### Switchless

- ON** Starts automatically when you breathe.
- OFF** Stops automatically in 5 seconds after doffing.

### Cordless

There is no battery connection cable, which simplifies preparation when donning the mask and does not disturb your work. Have no concern of disconnection.

**Breath Responsive PAPR**

Provides purified air by fan responding to breath.

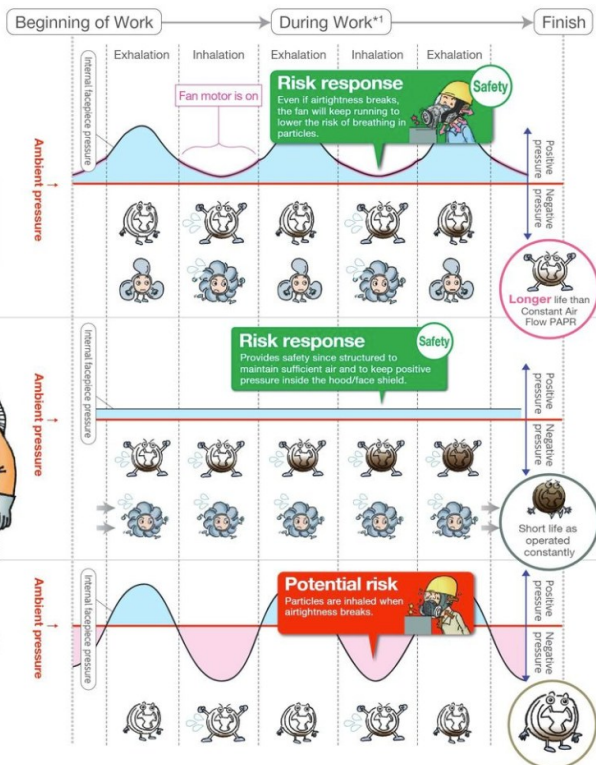

**Constant Air Flow PAPR**

Provides purified air constantly by fan.

**Reusable Respirator**

Breathing by lung capacity only.

## SHIGEMATSU PAPR - Powered Air Purifying Respirators

PAPRs consist of a respirator which takes ambient air that is contaminated with one or more type of pollutant or pathogen, actively removes (filters) a sufficient proportion of these hazards, and then delivers the clean air to the user's face and/or mouth. PAPRs are sometimes called positive-pressure masks. This PAPR system is designed for use with silica dust and other fine particulates such as soot.

**Game-changing, cable-free respirator. Breath Responsive meaning longer battery life and minimised pressure drop if seal broken.**

### Sync11VP3 PAPR Powered Half Mask - One Size

- Switchless: ON : The system starts automatically as you breathe. OFF : It turns off 5 seconds after doffing.
- Cordless: There is no battery connection cable, which simplifies preparation when donning the mask and does not disturb your work.
- Filter Replacement Indicator: An LED flashes when it is time to replace the filter.
- Half Mask PAPR: 450g

£595.00

**pr88**  
the wash-off hand protection

**100 ml 3.4 fl. oz. (3.4 L)**

**the wash-off hand protection**

**1 litre**

**Rub in**  
Before working, rub a hazelnut sized amount of pr88 onto your hands - especially to the finger nails and cuticles.

**Work**  
Only use as much pr88 as it takes for the protective film to dry after approx. 1 minute. The skin is now protected against contact with work materials.

**Wash off**  
After you have finished working, wash your hands with a little water and the dirt will be removed together with pr88.

**rath's PR88 Soot Barrier Cream - 1Ltr**

**PR88** it's a water soluble skin protection cream, which is applied before work begins.

**PR88** provides a non-greasy, non-sticky barrier against carbon based substances like soot and creosote, fats, paint + thinners, tar, dyes, resins, non-polar organic solvents, fiberglass, superglues, ink, graphite., epoxies, etc.

**PR88** will not wipe off the skin nor transfer to surfaces touched once it has properly set on the skin (after approx. 1 minute)

**£12.50 - 1 Litre**

**BANBRIDGE**

**BIGGAR**

**PORTLAOISE**

In 2026 six companies in the stove and heating industry are taking to the road from the 2nd - 6th March 2026 and doing pop-up expo's in:

Biggar, Scotland - Banbridge, Northern Ireland - Portlaoise, Ireland.

These pop-up expo's will only be successful if they are attended by chimney sweeps and stove installers, so we'd really appreciate that the word is spread and to get as many folk to turn up on the day and see the kit in the flesh so to speak!

## Rotary Sweep Systems

**INNOVATION DISTINGUISHES BETWEEN A LEADER & A FOLLOWER**

# SnapLok

Rotary Sweep Systems

**TWICE THE BUTTONS  
TWICE THE SECURITY  
TWICE THE QUALITY  
TWICE THE VALUE**

### Why SnapLok...

**Design** - The SnapLok 'Dual Button' connection is the fastest on the market due to the fact that less rotation is needed to engage the buttons once joined together impossible to disengage while rotary cleaning because both buttons cannot be pressed at the same time.

**Innovation** - SnapLok is constantly innovating and evolving with new products, it offers the widest range of over 200 cleaning heads on the market with several of our own innovations that are only available from SnapLok.

**Quality** - SnapLok only uses high quality materials that ensures longevity, there is no comparison to materials like stainless steel which competitors try to compare with inferior products and materials.

**Comparison** - 'Buy cheap, buy twice'. When comparing SnapLok equipment with competitors products, do not just compare the cost, but compare the materials used and the technical design, as this is a true reflection of comparison.

**THE BITTERNESS OF POOR QUALITY REMAINS LONG AFTER THE SWEETNESS OF A LOW PRICE IS FORGOTTEN**

My name is Mark Hart, a former British Army veteran and professional chimney sweep of 10 years. When I started sweeping, I used manual sweeping rods and brushes for 4 years and then started using rotary sweeping equipment. At that time there was only one main rotary rod manufacturer and after an initial expensive purchase, I soon found out that there were many design issues which caused a great inconvenience due to the rods locking up and frequent rod breakages. So when I tried to resolve these issues with the manufacturer, I was treated very unprofessionally and it soon transpired this was a common theme with other chimney sweeps using the same equipment. Due to the rod manufacturer having no competitors, the equipment was overpriced and customer service was severely lacking, so roll on 12 months and at a trade exhibition I discovered SnapLok rotary equipment. The innovation and quality

was hugely noticeable in comparison, so I bought a SnapLok liner kit and the difference was noticeably night and day compared with the other rotary rod manufacturer.

SnapLok in the UK at that time was very poorly marketed and very few sweeps knew about it, so I took the decision in 2015 whilst still sweeping, to offer an alternative rotary rod system to chimney sweeps and started Rotary Power Sweeping Ltd in 2015 and became a SnapLok distributor. I soon learnt early on after talking to many sweeps, that the whole chimney sweep equipment industry was very poor in responding to sweeps needs in a timely manner and customer service was severely lacking.

I initially expected to sell a few rods to fellow chimney sweeps that I knew personally, but the response by sweeps with SnapLok rotary equipment was phenomenal, with many sweeps converting over to SnapLok and within 4 months I took the brave decision to stop sweeping and sell SnapLok equipment full time. I sold my chimney sweep van and bought a shed in the garden to work from, but within 4 months and sales booming I had no choice but to move into a small warehouse. By now I had also established distributors in Sweden, Norway, Spain and Romania. Rotary Power Sweeping had established itself as a company known for excellent customer service and SnapLok as a quality, innovative product.

In 2016 RPS moved into large warehouse which included two classrooms for training purposes, we were appointed the SnapLok Master Distributor for Europe and soon had over 20 European distributors and so to this present day SnapLok is the most widely used rotary equipment by chimney sweeps throughout the UK, Europe, USA & Asia, it is seen as the benchmark for customer service, quality products, innovation and is perceived as unrivalled amongst its competitors.
