

Carbon Monoxide Alarms

WHY DOES MY ALARM KEEP BEEPING 🗲?

ONE BEEP 🗲 PER MINUTE

Low battery warning

Low battery warning will probably start at night when the batteries are at their coldest. As the battery continues to get weaker the beeping will become more frequent until it is doing it at all times of day. The battery is not replaceable so replace the alarm. If the alarm is less than 10 years old, contact the installer or the manufacturer.

TWO RAPID BEEPS 🗲 PER MINUTE

Fault signal

If the alarm is less than 10 years old, contact the installer or the manufacturer.

THREE RAPID BEEPS 🗲 PER MINUTE

End of life alarm

If problem persists and the alarm is less than 10 years old, contact the installer or the manufacturer.

REPEATING SERIES OF FOUR BEEPS 🗲 WITH A RED 🔴 LED

Full alarm

EVACUATE THE PROPERTY AND CALL THE EMERGENCY SERVICES

REPEATED NUISANCE FULL ALARM

If you have been advised by an approved Gas Safe Engineer that you have had a nuisance alarm – Contact Fireblitz for further information and guidance.

WHY IS THERE A FLASHING YELLOW 🟡 LIGHT ON MY ALARM?

THIS IS A FAULT! If the alarm is less than 7 (or 10 if it is a C07B-10Y) years old, contact the installer or the manufacturer.

MY ALARM IS COMPLETELY DEAD

Does it work when tested?

YES
